

The FloroCryl MMA (Methyl Methacrylate) systems install with a minimum of down time, even in freezing temperatures. FloroCryl systems are seamless, sanitary floors that are highly durable, flexible and resistant to a wide range of chemicals.

FloroCryl systems are ideal for any floor where cold temperatures or quick turnaround is a factor.

FloroCryl SL:

Solid color coating ideal for floor areas which are subject to light mechanical wear.

FloroCryl Chip:

Decorative chip design ideal for floor areas which are subject to light mechanical wear.

FloroCryl Quartz:

Decorative, slip resistant quartz design ideal for floor areas which are subject to moderate mechanical wear.

FloroCryl Shop:

Solid color, slip resistant coating ideal for floor areas which are subject to moderate mechanical wear.

FloroCryl Build:

Solid color, smooth or slip resistant coating ideal for areas which are subject to heavy mechanical wear.

FloroCryl Deck:

Decorative quartz, slip resistant design ideal for parking structures. Suitable for waterproofing and heavy mechanical wear.

- Resistant to chemicals
- Its adhesion to concrete is superior to traditional epoxies
- Can be installed in sub-zero temperatures
- Ready for full traffic within two hours after installation
- Withstands heavy loads
- Extremely hard-wearing
- Heat resistant
- Complete installation in one day
