100% Solids Colourants

Product Description:

Florock 100% Solids Colourant make pigmenting a variety of Florock Systems fast and easy. Available in 8 x 0.95 litre cases, these colourants allow for convenient job site tinting. Unlike traditional solvent based colourants, Florock 100% solids Colourants are solvent-free and will not slow the cure time of blended resin systems.

Instructions for Use:

1. Always mix or mechanically shake the can of colourant prior to blending in resin. Using the Usage Rate Table, determine how much 100% Solids Colorant will be necessary. Remember to calculate the quantity of 100% Solids Colourant needed, based on the combined volume (A & B mixture) of a two component system.

2. When pigmenting a dual component system, blend the two components together per system instructions. Induct if necessary. Then add in the amount of 100% Solids Colourant as specified in the Usage Rate Table.

3. Blend well, using a low speed mechanical mixer for a sufficient time to develop a homogeneous appearance.

Florock 100% Solids Colourants are compatible with the following Florock Systems:

• Floropoxy 4700, 4750, 4805, 4860 & 4870
• Novolac
• Florothane CR 250

• FloroFlex 6500 series

Note: Consult your Florock Representative for use with other Florock Systems.

Note: The pigmenting of clear resin systems may result in a change of their chemical resistant properties.

Please read material safety data before using product.
