Universal Colourants

Product Description:
Florock Universal Colourants make pigmenting a variety of Florock Systems fast and easy. Available in 8 x 0.95 litre cases, these colourants allow for convenient job site tinting.

Instructions for Use:
1. Always mix or mechanically shake the can of colourant prior to blending in resin. Using the Usage Rate Table, determine how much Universal Colourant will be necessary. Remember to calculate the quantity of Universal Colourant needed, based on the combined volume (A & B mixture) of a two component system.

2. When pigmenting a dual component system, blend the two components together per system instructions. Then add in the amount of Universal Colourant as specified in the Usage Rate Table.

3. Blend well, using a low speed mechanical mixer for a sufficient time to develop a homogeneous appearance. Be sure to use all of the pigmented MCU within 24 hours.

Florock Universal Colourants are compatible with the following Florock Systems:

- Florothane MC Ultra 100
- FloroWear 7100

Note: Consult your Florock Representative for use with other Florock Systems.

Note: The pigmenting of clear resin systems may result in a change of their chemical resistant properties.

Please read material safety data before using product.
